

# FALCON®

## T Series

Grade 1, cylindrical lock

### Overview

Falcon is focused on offering a solid product, which is why the T Series lock is constructed with a compression spring that far exceeds ANSI/BHMA cycle test requirements. Unlike typical torsion springs that can break at the bend points, the T Series spring provides the most robust lever support for years of reliable performance. Perfect for high-use applications, the T Series lock delivers on Falcon's promise of providing a solid product at a solid price.

#### **Falcon fits - The most versatile lockset in the business**

- Fits most competitors' conventional key systems
- Fits most competitors' small format interchangeable cores
- Fits the Schlage full size interchangeable cores
- Pressure Release® lever rotation standard. Prevents damage to internal lock components when subjected to excessive force.
- Ideal for both new construction and retrofit
- Designed for high-use applications such as multi-family, retail, office, institutional and government/military
- Seven lever designs and eight finishes to suite with any architectural design

# T Series

The most robust lever support

One piece machined steel lever spindle carries high levels of torque and shear. No seams to split.

## Modern design

Designed to complement modern designs, T Series levers are available in seven different styles. Additional options such as abrasive coating and lead lining are available on all T Series levers to cover a variety of application requirements.
