

THE RIGHT HINGES KEEP DOORS PROPERLY ALIGNED AND OPERATING SMOOTHLY.

HINGES

Reliable Hinges Keep Doors Operating Safely and Smoothly.

Door reliability starts with hinges. Throughout our history, STANLEY has been designing, manufacturing and delivering high-quality commercial hinges.

From ball bearing and concealed bearing, to spring and continuous styles, STANLEY offers hinges that fit your specific door, frame and wall application. Their durable construction, and choice of standard or heavy-duty options, ensures you get the right solution for a range of door weights and sizes.

HINGES

THE RIGHT HINGES MAKE ALL THE DIFFERENCE.

Equipped with easily seated non-rising pin

Permanently lubricated ball bearing hinges or maintenance-free concealed bearing hinges for smooth operation

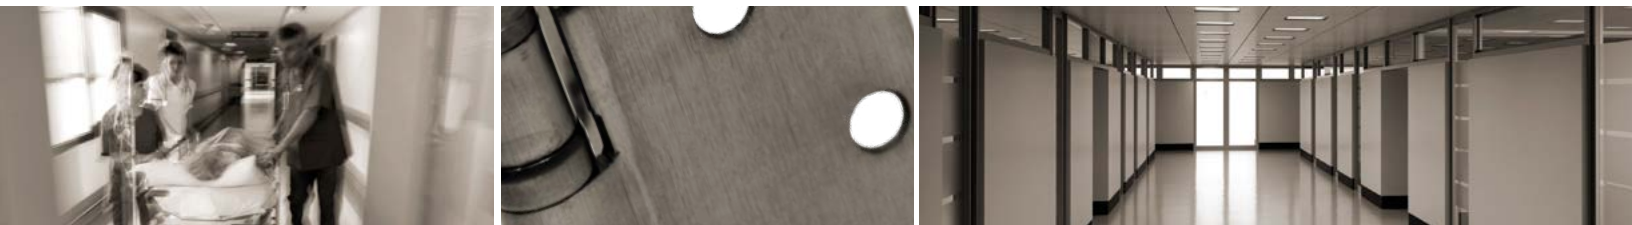

Standard- and heavy-weight hinges available for low- to high-frequency door applications

Stainless steel pins in all non-ferrous hinges

Conforms to ANSI/BHMA Standards

Templated screw hole-patterns for use on wood or hollow metal

Plated and polished steel hinges for fine, durable finish

STANLEY Hinges Get the Job Done in Any Application.

STANLEY hinges have been around since 1843 and is a brand name you can trust.

- **Easy to Install** – Package comes with fasteners and cardboard shims for quick installation and alignment
- **Versatile** – Full-mortise, half-mortise, half-surface and full-surface options, in a wide range of sizes and finishes, for any door/frame/wall application
- **Reliable** – Constructed with durable bearings and high-quality materials for long-lasting maintenance-free operation

STANLEY. Built to Last.

STANLEY has been manufacturing hinges since 1843, when Frederick T. Stanley founded The Stanley Works in New Britain, Connecticut. Today, STANLEY is setting the standard for tough, dependable, long-lasting door hardware. From engineering and development, to product delivery and quality STANLEY is constantly moving forward with innovative solutions that work.
