

SCHLAGE

CS 210 Series

Interconnected lock

Overview

The CS210 interconnected lock provides exceptional performance, aesthetics, and flexibility for both residential and commercial applications. The CS210 features single motion egress (retracting both the latch and deadbolt simply by rotating the inside lever) to meet Life and Safety code requirements, while exceeding BHMA Grade 2 requirements for operational usage, security, cycle and finish. 15 lever designs, two outside deadbolt designs and two inside escutcheon designs - each in a choice of six finishes - ensure the right aesthetics for whatever type of project. The adjustable escutcheon allows each lock to easily support either 4" or 5 1/2" door preps, eliminating any job-site surprises.

Features and benefits

Aesthetics

- 15 lever styles
- Two deadbolt designs
- Two escutcheon designs
- Six finishes
- Suites with F Series and S Series tubular locks

Flexible

- Field-configurable for 4" or 5 1/2" door prep
- Supports 2 3/8" or 2 3/4" backsets
- 1 3/4" - 2" door range standard; 1 3/8" available

Key systems

- Standard, FSIC, and SFIC

Reliable

- ANSI/BHMA Grade 2 (A156.25)
- 3 hour UL fire rating

Ordering instructions

Order using standard Schlage order form as follows; images of designs and finishes shown on bottom of page:

CS210 Series interconnected lock
